

How To Measure Hole Centres

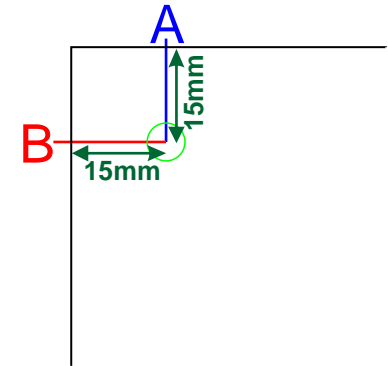

Step A. Measure from the top edge to the centre of where you would like the hole.

Step B. Measure from the side edge to the centre of where you would like the hole.

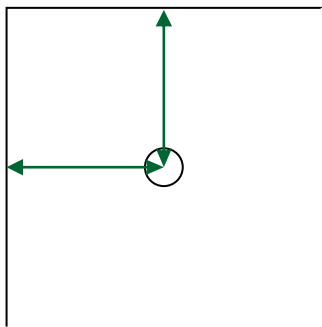

Step C. You will now have your hole centre measurement which, for this example, is described as 15mm Centres.

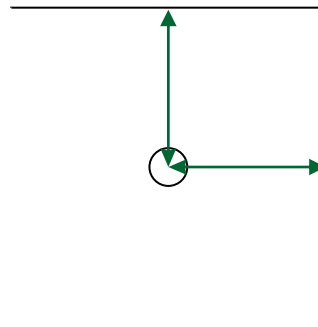

Note: If your hole locations are not square or vary for each corner, please complete the templates below, as appropriate, and send us a copy after you place your order.
